STEWART INTRODUCTIONS

Estrellita

(Illustration Opposite Page)

This variety has for the past several seasons performed perfectly in our seedling gardens. Two seasons ago we had a severe drought and our seedling book reports on this variety were the very best. Last season was unduly wet and cold in the early part, giving many varieties a handicap shortly after their planting. These conditions, however, had no effect on Estrellita for it bloomed beautifully, again proving that it can withstand the most severe growing conditions.

The flower possesses unusual vigor, the spike being extremely sturdy yet not mammoth in diameter. The flowers are of the large, wide open type, there never being less than ten of them open at one time in double row formation. A most outstanding characteristic of this variety is the fact that the flowers are connected unusually firm to the spike, being perfectly rigid, and in handling them for cut flower purposes one never loses a floret or finds one wilted, or burnt at the edges from excessive heat. It is truly an A-1 variety for either exhibition or commercial purposes. The spikes are tall, averaging over five feet in height, and the flower-heads are of the best, as can be seen from the photograph on the opposite page. For those of you who are interested in parentages, Estrellita is a cross between Star of Bethlehem and W. H. Phipps. It carries its color from these parents as one would expect, being a most pleasing, light, cameo pink, with a slight overlay of a deeper tone. The large, white face on this variety adds to its attractiveness. Bulbs are always vigorous and healthy, and the bulblets germinate readily. You who wish the newest and best in gladiolus, should try Estrellita this year. We know you will be delighted with this outstanding variety.

ESTRELLITA PRICES—Bulbs \$15.00 each (Large size only); Bulblets \$3.00 each.

Sun God

This variety is one that will stand out over all others in your garden. Its color is that particular shade of clear, brilliant scarlet that is most outstanding. To complete the attractiveness of this variety is a very pronounced, rich yellow blotch, and an extended, rich yellow feather. The spikes are always extra tall and straight, carrying from eighteen to twenty-one buds. The flowers easily withstand extreme heat and the variety will hold six or more large blooms open at one time. For those of you who especially like richness and vividness of color, we highly recommend Sun God. A BOUQUET OF SUN GOD IS A PICTURE THAT ONE CAN NEVER FORGET.

SUN GOD PRICES—Bulbs \$15.00 each (Large size only); Bulblets \$3.00 each.

Valentine

(Illustration Front Cover)

The illustration on the front cover will give you an accurate idea of the excellent quality of bloom that may be expected of this variety. Valentine, introduced in 1938, is all the name implies—a real beauty in a bright, clear scarlet, with a large, attractive, white throat. A strong, vigorous grower, Valentine will hold eight or more florets open at one time, and each floret perfectly placed on an always tall, straight spike. Valentine has been a favorite of all visitors to our gladiolus gardens, so BUY VALENTINE THIS YEAR AND SHOW YOUR FRIENDS AND VISITORS TO YOUR GARDENS THE ULTIMATE IN GLADIOLUS.

VALENTINE PRICES—Large Bulbs, 1-\$1.00; 10-\$9.00; (Large size only this year, and no bulblets).

1940

STEWART INTRODUCTIONS

The public has been waiting a long time for a blue gladiolus which is healthy and which possesses good growing habits. Many originations have been forthcoming but it seems that every blue gladiolus available today is not quite up to par in vigor with gladiolus of the more popular colors, such as red or pink.

Last year we introduced one of our blue seedlings which possesses all these fine qualities. A blue which is as robust as any gladiolus you can name, regardless of color. We chose to name our introduction:

Blue Heaven

Blue Heaven is medium to light blue. It carries a double row of good sized florets, holding eight to ten open at one time, even in extreme heat. The foliage is healthy, the bulbs are round, plump, and clean, and the bulblets germinate readily. Here is a blue gladiolus which can be grown by all flower lovers, not just by the connoisseur. It will respond to average care and culture and will produce just as healthy and beautiful a bloom as any other gladiolus in your garden. Its valuable characteristics warrant no change in price.

BLUE HEAVEN PRICES—Any size Bulb \$10.00 each; Bulblets \$1.00 each.

Jack Frost

A beautiful, shimmering, pure white sport of Phyllis McQuiston. This variety has all the excellent characteristics which one would expect it to have, being a sport of Phyllis McQuiston.

As a cut flower white it is unequalled. It opens six or eight florets at one time on a tall, strong, always erect spike of twenty or more buds. The stock is clean and healthy and the bulblets germinate readily. Blooms open well from shipment, and for these reasons we predict that it will be one of the leading white commercials in a very short time. Last season the local florists again accepted it as one of the finest cut flower whites they had ever used.

JACK FROST PRICES—Any size Bulb \$10.00 each; Bulblets \$1.00 each.

Del Rio

A most meritorious variety which attracted much attention from the visitors to our seedling garden, probably because of the A-1 placement of its double row of large flowers. It opens easily six or more at one time on an always tall, strong spike of twenty or more buds. The flowers are a smooth cream, slightly ruffled, blending to a deeper, rich cream throat. Its growing habits are excellent and the bulblets germinate readily. Our only regret is that the stock is not yet plentiful enough for us to use it as a commercial. Surely when it is better known, and the stock increase is sufficient, it will be one of our leading commercial cut flowers in the cream colored class.

DEL RIO PRICES—Any size Bulb \$10.00; Bulblets \$1.00 each.

1939

STEWART INTRODUCTIONS

Mrs. K. T. Keller

(Illustration Page 2)

This variety is much larger than any of the present yellows; and of the wide open type. It is an exquisite shade of perfectly clean, soft yellow, blending to a deeper throat without any markings whatsoever, giving the entire flower a depth and richness enhancing the beauty of this stately variety. There are six or more of these large flowers open at one time on an extra tall, mammoth spike of twenty buds. A most vigorous plant, a real improvement in the yellows.

MRS. K. T. KELLER PRICES—Large Bulbs, 1-\$3.00; 10-\$24.00; Med., 1-\$2.00; 10-\$16.00; Small, 1-\$1.00; 10-\$8.00; Bulblets, 1-\$.30; 5-\$1.00.

Eileen Friedell

The florets are a perfectly clear, soft white, a touch of refinement being given by an equally soft, yet rich, ruby throat. The entire flower has this outstanding smoothness and richness of color, giving unusual distinction to this gorgeous flower. The plant is vigorous and strong. The tall, erect spikes of eighteen or more buds hold easily five florets open at one time.

EILEEN FRIEDEL PRICES—Large Bulbs, 1-\$3.00; 10-\$24.00; Med., 1-\$2.00; 10-\$16.00; Small, 1-\$1.00; 10-\$8.00; Bulblets 1-\$.30; 5-\$1.00.

Mrs. Julia P. Buhl

Something very different and unusual. A large flower on a tall, heavy growing plant that is vigorous. Something new in the violet color class. The large flower is rich violet with a blue cast at the outer edges of the petals, and blends gradually to a soft cream throat, which is overlaid with a delicate blue violet feather. It will hold four or more open at one time, and is very well liked wherever shown.

It is our privilege to name this flower for one who loves and has given so liberally for the children of Sharon, Pa. Her philanthropic work will ever be on the tongues of Sharonites. A real lover of flowers, which was so freely expressed on her numerous visits to our gardens.

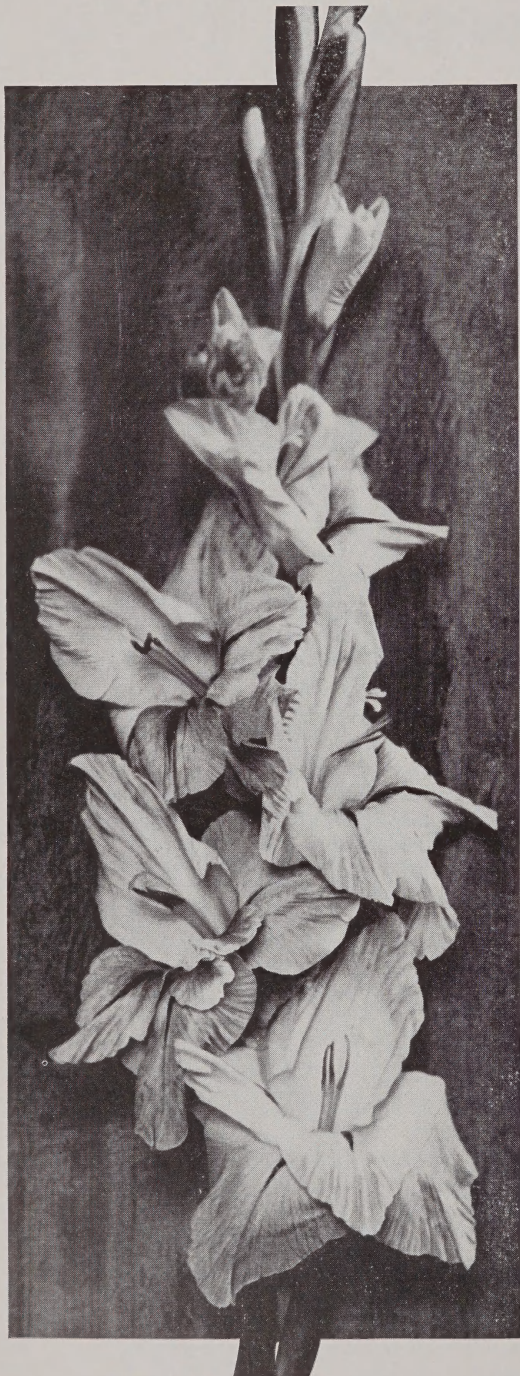

MRS. JULIA P. BUHL PRICES—Large Bulbs, 1-\$3.00; 10-\$24.00; Med., 1-\$2.00; 10-\$16.00; Small 1-\$1.00; 10-\$8.00; Bulblets 1-\$.30; 5-\$1.00.

Acona

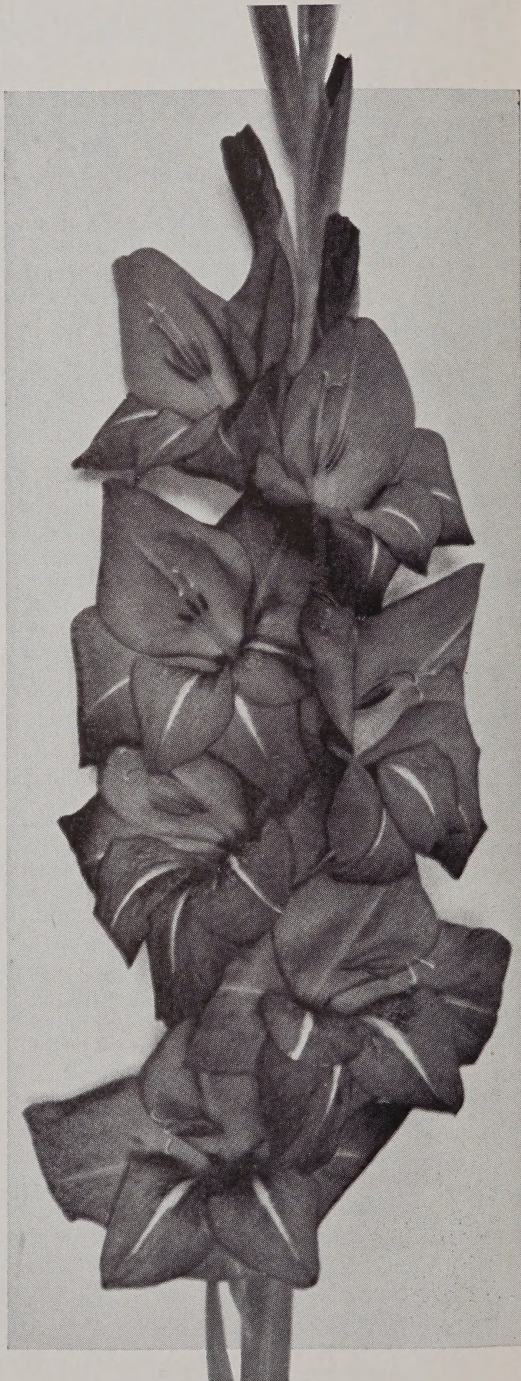

A very VALUABLE EARLY CUT FLOWER variety. This clear cream is slightly ruffled, holding five or more open. The flowers are medium in size and the spike is better than medium length. A good strong grower, always erect and straight; a good producer. Coming as it does, well before the others in its color range, it is always in demand. A REALLY PROFITABLE VARIETY FOR THE COMMERCIAL GROWER, and the best early cream for the home garden.

ACONA PRICES—See Page 14.

Mrs. Walter P. Chrysler

Persian Orange

1938

STEWART INTRODUCTIONS

Mrs. Walter P. Chrysler

(Illustration Opposite Page)

This flower is distinctly different, with its curls and ruffles. We have seen nothing to compare to the individuality this flower possesses. Six or more of these light rose pink flowers are open at one time, blending nicely to a bright throat; a pronounced deep rose line marks the center of each petal.

A beautiful spike with ten open took a sweepstake award in the decorative class for Mr. H. E. Hulbert at the recent Empire State Gladiolus Society Show, held at Syracuse, New York.

PRICES—See Page 20.

Persian Orange

(Illustration Opposite Page)

The very finest exhibition, bright, true Persian Orange. A shade that is new. The excellent height and straightness of its spikes, along with the clear, sharp median lines add to the chicness of this variety. This year at two Societies' Shows affiliated with the N.E.G.S. Persian Orange won blue ribbons in the Recent Introduction Class, over many meritorious entries. An excellent producer and vigorous grower, THIS VARIETY SHOULD BE INCLUDED IN EVERY-ONE'S GARDEN.

PRICES—See Page 21.

Andree Clark

A perfectly clear, light rose pink without markings, occasionally a slight overlay. The spikes are extra tall and upright, carrying six or more of these lovely large flowers open at one time. Certain to become a very popular and lasting variety with its strong habits of growth and ease of production.

PRICES—See Page 14.

La Grace

Here we have charm. A medium size flower of exquisite light La France pink, with vivid thumb nail throat marks of bright pink; delicately ruffled; all combining to enhance the sweetness of this refined variety. Always a winner.

PRICES—See Page 19.

Lindsay

This variety has proven itself many times as being superior to all in the buff-orange color class. There are eight or more large flowers open at a time on a perfect spike. It is an excellent cut flower, withstanding the warmest August days.

PRICES—See Page 19.

Mary Damaris

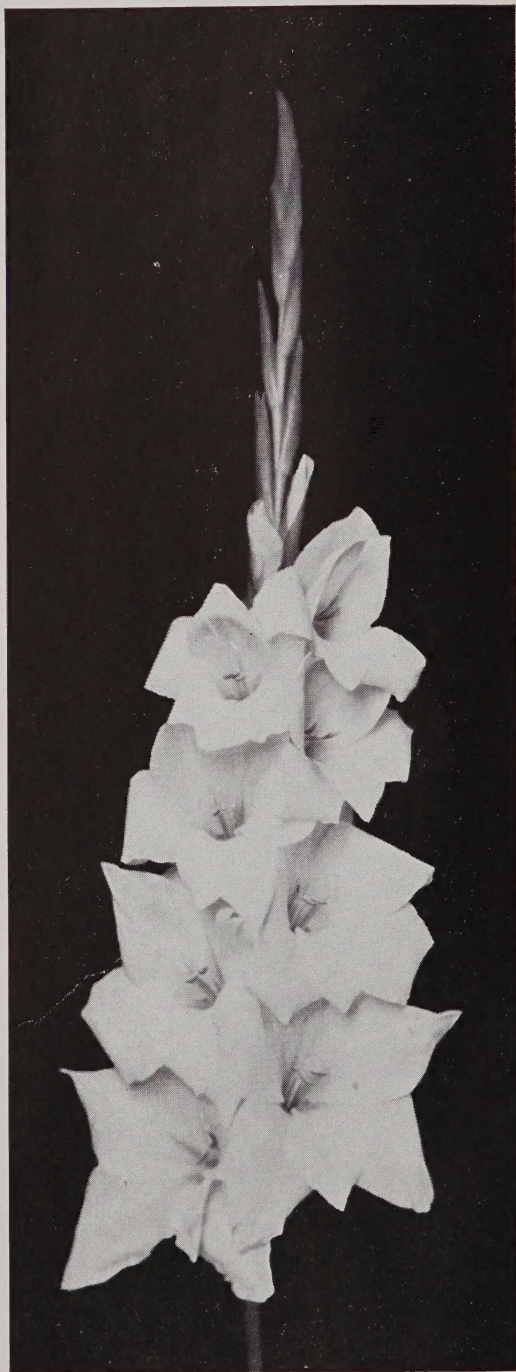

This is by far the most beautiful shade of soft yellow I have ever seen in gladiolus, perfectly clear with white stamens. Its placement is ideal and holds seven or more large flowers open at one time. A vigorous grower and good producer, MARY DAMARIS IS THE MOST SATISFACTORY CUT FLOWER AND EXHIBITION YELLOW TODAY.

PRICES—See Page 20.

Blue Bizarre

Success

EARLIER

STEWART INTRODUCTIONS

Blue Bizarre

(Illustration Opposite Page)

A real novelty, and the recipient of many favorable comments wherever shown. It has unusual color, being a light violet blue with varying overlays of deeper violet blues, some of the flowers being comparatively clear. The florets are better than medium in size on a tall, strong spike. It grows vigorously and is an ideal cut flower. **TRY BLUE BIZARRE THIS YEAR AND WE GUARANTEE YOU WILL BE BACK FOR MORE.**

PRICES—See Page 15.

Success

(Illustration Opposite Page)

This perfectly pure white is positively the most arresting variety we have. A tall, strong, stately, pure white with immense flowers and with seven or more of them open at one time. This year, as in past years, it won more than its share of blue ribbons at the various gladiolus shows throughout the country. It is truly one of the very finest exhibition whites on the market today. And too, its blooms are constantly bringing us **PREMIUM PRICES** on the Chicago, Cleveland, Detroit, and Pittsburgh markets.

PRICES—See Page 22.

Alfred M. Landon

Coming as it does well before the rush of summer bloom, makes this a much sought after flower by the florist. We are still unable to meet the demand for it. This variety, with "Village Queen," and "Jessica Dragonette" make a trio of **TOP PRICE EARLY CUT FLOWERS** that are welcomed by the florists, both wholesale and retail.

"Landon" is a smooth, soft scarlet of good size with 8 or more blooms open on an extra tall, erect spike. A vigorous grower and good producer, this variety is always in demand. Be wise and get your start on this one now.

PRICES—See Page 14.

Alice Herriott

The warmth of this beauty with its blending of rich cherry-rose and cast of blue in the upper throat, makes it one of the most beautiful flowers we have. A tall, strong spike with eight of these beauties open at one time makes a truly impressive picture. A flower that you will be proud of in your garden.

PRICES—See Page 14.

Precious

A dainty flower of smooth cameo pink, heavily ruffled and lacinated. Perfect for table decoration. It grows about thirty inches tall, blooms perfectly from medium sized bulbs and is quite prolific. **JUST RIGHT FOR THAT SMALL VASE.**

PRICES—See Page 21.

EARLIER STEWART INTRODUCTIONS

Totem

We have never grown a variety that produces more excellent spikes than this one, and the placement is never faulty. It opens perfectly from shipment, and easily withstands the hottest August days. The flowers are very large and round, with five or more of them open in perfect placement on an extra tall, erect spike. Truly an outstanding variety.

The color is correct as a cut flower, a brilliant salmon scarlet. This variety always brings top prices, being a perfect shipper and opening well expanded flowers. Reports from Florida, Mississippi, and New England, assures us that it is the best, by far, in its color class. Here we offer a tried and true cut flower variety.

PRICES—See Page 23.

Margaret Stewart

One of our most popular varieties, and a real beauty. A shimmering, rich, beautiful, red-red rose, a shade not to be found in any other variety. It possesses the very best of growing habits, consistently producing tall, straight spikes with five or more good sized flowers open at one time. A GRAND VARIETY FOR YOUR HOME GARDEN. Then, too, the florists use it freely, which indicates its unusual and correct shade of rose-red.

PRICES—See Page 20.

Village Queen

This variety is making quite a name for itself. Many growers, as well as several local florists, have chosen it as one of the very best early commercials we have. An excellent cut flower, this variety is truly an asset to everyone's garden. It produces tall, strong spikes of eighteen or more buds carrying easily five or more extra large flowers open at one time.

It has also proven itself earliest in the greenhouse over all other varieties grown for that purpose. Truly a VALUABLE COMMERCIAL, worthy of your trial.

PRICES—See Page 23.

Major Edward Bowes

(Illustration Opposite Page)

This is a massive plant producing tall, heavy spikes that carry the long flower-head perfectly. It is not unusual to have more than twenty buds to the spike, and it easily holds eight or more flowers open at one time.

The flowers are a large, bittersweet pink with occasional overlay of a slightly deeper tone. The small, neat pinard yellow throat adds much to the attractiveness of this outstanding variety. Excellent for exhibition, the "Major" has become one of our most popular varieties.

Last year we were unable to fill all orders on the large size, SO ORDER YOURS EARLY THIS YEAR TO AVOID DISAPPOINTMENT.

PRICES—See Page 19.

Phyllis McQuiston

(Illustration Opposite Page)

The most gorgeous pure pink that blends perfectly to a soft light throat.

Last year it again proved itself THE MOST POPULAR OF ALL PURE PINKS. It grows freely producing tall, strong spikes that are always erect. It carries eighteen or more buds and holds easily five open at one time.

This variety has not arrived at its present enviable position among growers of gladiolus, both amateur and commercial overnight. It has by its own performance proven itself unequalled and for this reason it will be grown for many years to come, and in ever greater quantities.

"Phyllis" was our first introduction. It has been and will be a profitable variety to grow, so JOIN US AND GET YOUR START NOW.

PRICES—See Page 21.

Phyllis McQuiston
(Stewart)

Major Edward Bowes
(Stewart)

EARLIER STEWART INTRODUCTIONS

Colfax

This is a beautiful shade of velvety rich, deep violet. The flowers are better than medium in size and have exceptionally heavy texture. There are four or more open on a nice strong spike, that is always straight.

There was a run on this variety last year, which proved our prophecy that it would sell just as soon as it was more widely known. As a result, we can offer only large and medium sized bulbs this year, and no bulblets. HERE, AGAIN, WE SUGGEST YOU ORDER EARLY.

PRICES—See Page 16.

Elsie Adele

(Illustration Opposite Page)

A perfectly smooth, clear La France pink, a dignified, refined beauty. The spikes are very tall and rigid, with five or more large flowers open at one time on a spike of sixteen or more buds. ELSIE ADELE IS AN EARLY CUT FLOWER AND VERY VALUABLE FOR THE COMMERCIAL GROWER, for there is no variety that approaches "Elsie" in its color class. And too, all wholesale growers know that the smooth light "pinks" are always used in a majority by the florists. "Elsie" is shipping very well from Florida, also.

PRICES—See Page 17.

Elite

The flowers are a brilliant salmon pink, running to peach red, with a very snappy Neapolitan throat. It produces tall, strong spikes with a double row of flowers, carrying six or more open at one time. This variety is particularly attractive when grouped in a bouquet, or in floral sprays.

PRICES—See Page 17.

Jessica Dragonette

(Illustration Opposite Page)

This flower is an exquisite, clear, rose pink, blending to a lighter throat. The entire flower, which is of better than medium size, has a blue sheen, giving it real beauty. A vigorous growing variety of good height with four or more flowers open. A good producer, and much to be desired as AN EARLY CUT FLOWER.

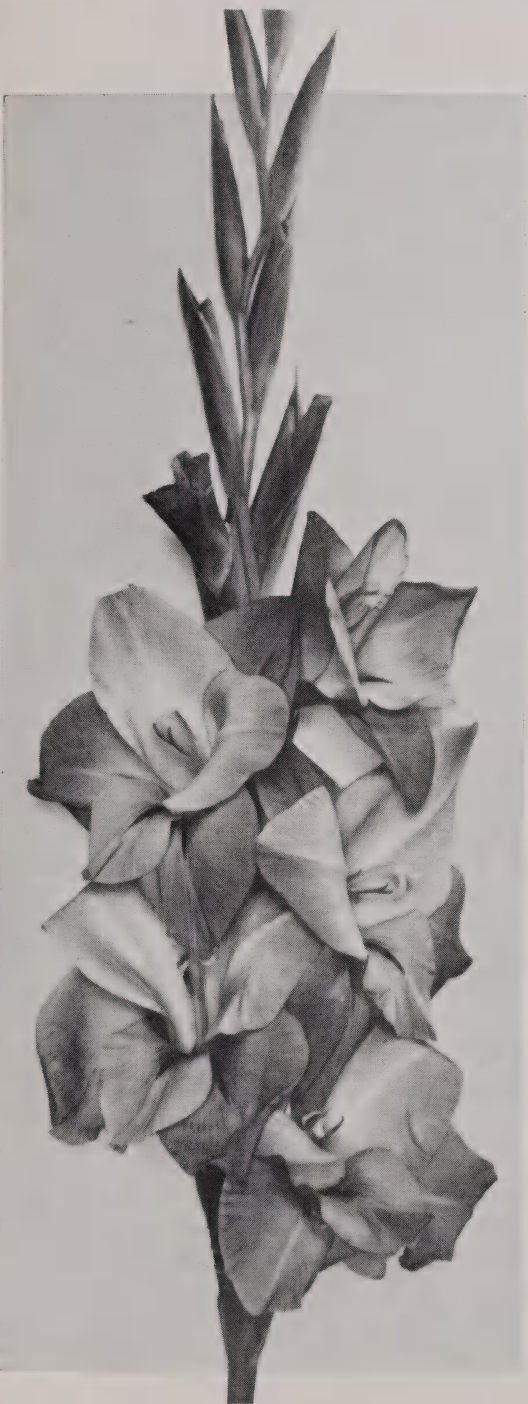

PRICES—See Page 18.

Euclid

The flowers are a large, wide open white, blushed light pink at edges, with a touch of soft cream in the throat. It holds five or more florets open at one time on a tall, strong spike. This variety has proven very popular, so IF YOU HAVE NOT ALREADY TRIED THIS ONE, BE SURE TO INCLUDE IT WITH YOUR ORDER THIS YEAR.

PRICES—See Page 17.

Jessica Dragonette

Have you found in our catalog just what you would like? If not, write us about it.

MARY DAMARIS as it is grown and artistically arranged
in England by the late Major Churcher.

JOIN A GLADIOLUS SOCIETY

Every "glad fan" should be a member of his or her local gladiolus society. You not only derive a multitude of benefits therefrom, but you also, in this way, help to popularize this so beautiful and deserving a flower.

If you wish to obtain the finest and most up to date information on the gladiolus, by all means join THE NEW ENGLAND GLADIOLUS SOCIETY. Its annual and quarterly publications are the best to be had. They offer a wealth of articles, including botanical study of the gladiolus bulb, culture, hybridizing, symposiums, trial garden reports, research, and accurate show reports from all parts of the United States and Canada. The current 1941 Annual, consisting of 250 pages, beautifully bound and profusely illustrated, is a volume that any glad fancier will be proud to own.

Select from below the type of membership you prefer, and send to Albin K. Parker, Secretary, Norwood, Mass.

REGULAR MEMBER—\$1.00; Gives full benefits of the Society, and a copy of the regular edition of "The Gladiolus 1941."

SUPPLEMENT MEMBER—\$2.00; Gives full benefits of the Society, a deluxe copy of "The Gladiolus 1941", and in addition the April, July, and October Supplements.

SPECIAL COLLECTIONS OF STEWART ORIGINATIONS

THE VERY BEST IN GLADIOLUS—ALL TYPES—ALL COLORS

YOUR CHOICE

Please Read Carefully Before Ordering

ORDER EARLY—It avoids disappointment by eliminating the chance of the variety selected being sold out. However, we do not discriminate, our prices are the same in the spring as in the fall. Our stock is always guaranteed, early or late, our large storage facilities permit this.

GUARANTEE—We ship only first quality stock which grows easily. It is clean, insect pest and disease free, healthy and true to name. Every bulb is fully guaranteed as such. Should any prove otherwise, we will gladly replace or refund your original purchase price.

SUBSTITUTION—We do not substitute unless directed to do so. However, a second choice is advisable if late in the season.

SIZE—Our bulb sizes are standard and liberal. No. 1—1½ inch and over; No. 2—1¼-1½ inches; No. 3—1-1¼ inches; No. 4—¾-1 inch; No. 5—½-¾ inch; No. 6—¼-½ inch.

Large—1¼ inches or more in diameter (Nos. 1 and 2).

Medium—¾ to 1¼ inches in diameter (Nos. 3 and 4).

Small—¼ to ¾ inch in diameter (Nos. 5 and 6).

QUANTITY—3 bulbs will be sold at the 10 rate; 25 at the 100 rate; 250 at the 1,000 rate.

SHIPMENTS—Weather conditions govern this largely. They usually start about March 15th. Unless otherwise directed.

DELIVERY—All retail orders amounting to \$1.00 or more will be delivered free to all parts reached by Parcel Post. Orders amounting to less than \$1.00 will add 15c for postage.

TERMS—Remittances should accompany your order, and should be made by check bank draft, American Express or Postal money order.

REFERENCE—For our standing, you may refer to:

The McDowell National Bank of Sharon, Pa.

PRICES—having a number prefix, as **2-.05**, means **2 for 5 cents**.

Prices as given in this catalog supersede all previous quotations.

SERVICE—As we are one of the largest producers of gladiolus, we offer the best, with courtesy, being fully appreciative of your patronage.

BEST FLOWERS—An exhibitor insists on a young bulb 1¼" or more in diameter. Bulbs over two years old usually do not produce the maximum of flower, and frequently are a source of trouble from disease.

BULB PERFORMANCE—For the maximum performance or exhibition spikes—**Large** (over 1¼") are much to be preferred. **Medium** (¾" to 1¼") bulbs are of blooming size but the flower is not as large and requiring more time to bloom. **Small** (¼" to ¾") bulbs will at times bloom late in the season and are noticeably smaller in size; **Bulblets** cannot be depended upon, either to bloom or for germination, many fail to grow under the very best of conditions.

"Your Assurance of Beautiful Flowers"

Our gladiolus bulbs are the best it is possible to produce. They are well grown, without pampering or irrigation, are scientifically harvested, cleaned and stored. They receive final inspection and preparation before delivery to you. They reflect this culture and care by giving you their beautiful bloom, the kind of bloom all flower lovers are looking for. Be sure to give them a trial—this season.

CARE AND CULTURE

THE GLADIOLUS can be successfully grown in practically any soil. They are easily grown and respond wonderfully to a little attention, such as timely watering and cultivation. They will adapt themselves to most any garden and will be found doing much better than most flowers with an equal amount of effort by the grower, be he amateur or professional.

THE PACKAGE when received should be opened at once to admit air directly on bulbs—store in cool, dry and frost-proof place until planting time.

SOIL and LOCATION—Any good garden soil is very satisfactory; the soil should not be worked when wet, and should be kept pliable at all times during the growing season. They will not do their best in too much shade. They enjoy being planted in rows or in beds; they are valuable in the landscape, putting clumps of all one color or mixed at suitable points for the desired effect. The ground should be well drained for best results.

DISINFECTING—Precautionary measures guarding against insect pests and bulb troubles are very effective and most economical. The garden should be cleaned and the old tops of gladiolus as well as the tops of other plants and other refuse should be raked up and burned. The storage room should be clean and disinfected as well as the bulb containers before using them to store bulbs over winter. Disinfecting all bulbs before planting is an easy task and is advisable as it will practically eliminate any disease or insect pest. We offer but one method: this accomplishes all in one operation; use at the rate of one ounce of Bichloride of Mercury (poison) to 7 gallons water (B. of M. is more soluble in warm water). soak from 8 to 10 hours, the night before planting, (not necessary to remove husks); a simple procedure is to place bulbs in salt or sugar bags, tie strong string around top of bag, other end of string carrying the variety name on it, drop in solution, a stick will punch them under—after soaking, hang up by string to dry, or they may be planted wet. Use non-metallic container for the B. of M.

PLANTING—Have soil loose; make trench or hole deep enough so that bulbs can be covered with three inches of dirt, (sandy soil, five inches); plant bulbs three inches apart in the row. If fertilizer is used at planting time, keep at least two inches from bulb, by covering bulb with dirt before adding the fertilizer.

SPRAYING and THRIP—Thrip is a very small insect 1/16 inch, and the cause of most all gladiolus failures. It causes the plant to turn brown, and does not permit the development of a good flower. While this insect is no longer serious, preventative measures must be used. **Soak all bulbs** before planting, with bichloride of mercury as directed above. Thrip survive the winter in your storage, so take the bulbs to the garden in the container you soaked them in. Everything taken from the storage should be clean. Inspect the plants closely when small, start when they are 2" high—if thrip is detected spray daily until they are destroyed, then spray once a week, or as your case requires. They must all be destroyed before flower spike starts. Spray in the early evening, this gives a minimum of evaporation and permits the spray to spread more thoroughly. The best and most economical spray is Rototox—write them—The Rototox Co., 81 East Yale St., East Williston, N. Y. They will send you pamphlet on how to use Rototox, and prices.

WATER and CULTIVATION—Water thoroughly so that it will soak down to the bulb, at least once a week, but count a good rain as one; cultivate thoroughly next day if not sticky.

THE FLOWER—If you wish to cut the flower do it when the first flower opens wide. To get a nice spike with it, slide the knife down close to spike on one side stopping six to eight inches from ground, then slide it down the opposite side giving knife a twist at the bottom to remove spike with flowers; this operation cuts leaves from spike but they remain on the plant, which is essential to properly mature the bulb.

HARVESTING—Bulbs should be ready to dig three to six weeks after blooming, or dig when foliage starts to turn brown. Loosen bulb with fork or other tool and bulb will lift out by the top—shake dirt off—cut tops off close to bulb, let bulb fall in clean container (three inches deep), pile up tops for burning. Let bulbs cure three to six weeks in a dry, airy, frost-proof place, stir occasionally for thorough drying—they must be dry. When ready, the old root should snap off easily, leaving bulb clean; now store away for winter in containers (boxes or bags) not over four inches deep, in a cool, dry, frost-proof place.
